

## Valuable data demands **IRONCLAD™** proof of erasure.

Garner's revolutionary TS-1E degausser with IRONCLAD automated erasure verification and image capture system validates data has been completely eliminated. Fully integrated with the Garner TS-1E NSA/CSS EPL-listed hard drive degausser, the IRONCLAD scans the serial number, captures an image of the degaussed hard drive, and records the operator ID and erasure status of degaussed hard drives. This essential information is then preserved in an IRONCLAD erasure report. IRONCLAD provides complete documentation of the data elimination process.

## Why IRONCLAD

- NSA/CSS EPL-listed TS-1E degausser completely erases all data in 45 seconds
- Captures and records images of degaussed hard drives
- Scans serial numbers of degaussed hard drives
- Documents operator ID and erasure status of hard drives
- Generates IRONCLAD erasure report with images for audit purposes
- Creates a secure erasure verification process
- Provides proof data is completely eliminated
